

Appendix 3:

Directorate General of Telecommunications, MOTC **Certificate of Compliance Approval for Satellite** **Small Earth Base Station RF Equipment**

1. Applicant Name:
2. Manufacturer:
3. Manufacturer Model/Type:
4. Approval number:
5. Approval Date:
6. Compliance Approval Label:

DGT, MOTC Approval Label	
	<p>Equipment name:</p> <p>Applicant name:</p> <p>Manufacturer:</p> <p>Manufacturer Model/Type:</p> <p>Approval number:</p> <p>Operating Frequency:</p>

Explanation:

1. For the equipment approved by the DGT, the applicant shall follow the approval sticker example printed in the approved license to replicate additional stickers to attach to the equipment or to engrave the sticker on the equipment at an appropriate place. Before using the equipment, applicant shall apply for the base station license according to the requirements in the “satellite communications business administration regulations” article 21.
2. Applicant has the right to use the approval sticker as listed in the approval license. Other manufacturers shall receive permission from the applicant as well as notifying DGT for such request before using the approval sticker. Otherwise, these manufacturers shall submit their own inspection applications for the approval licenses.
3. For the test report DGT only reviews communications functionality between base station and satellite. DGT is not responsible for the special functions and reliability of the equipment.
4. For RF equipment that received the approval license, the DGT can cancel the approval license if the following conditions occur:
 - (1). The original equipment’s design or functions were modified and the applicant does not submit material for reapplication.
 - (2). The submitted application document or information is found to be false or counterfeit.
 - (3). Infringement of intellectual property rights.
5. For the approved RF equipment, the import, sale, installation and use of the equipment shall comply with related telecommunications regulations.
