

Attached Table 7: Limit value for interference through micro-reflection

Items	Approval Standards
Reflection delay 0.5 $\mu$ s	$\leq 10$ dB (relative attenuation values of main signal)
Reflection delay 1.0 $\mu$ s	$\leq 15$ dB (relative attenuation values of main signal)
Reflection delay 1.5 $\mu$ s	$\leq 20$ dB (relative attenuation values of main signal)
Reflection delay 4.5 $\mu$ s	$\leq 30$ dB (relative attenuation values of main signal)
