Superintendent of Organization:

Direct Superintendent:

Handled by:

Note:

1. For related frequency section of the specifications in Class III and higher amateur radio catalog, if only the Operating Frequency range of this radio is indicated, and "actual range" is replaced with "Depending on version" or "varies according to version", then concerning the review of related catalog data, after the accepting organization confirms that technical manual for its radio does not indicate the method of frequency expansion exceeding the frequency range ordered by IARU R3, the written review on its frequency receiving and transmitting range shall be carried out according to actual measured values.
